Madison.—The marriage of Miss Harriet Collins Buckley and Paul Redfield of Madison will take place at the home of the bride in Litchfield on Sept. 5th.

Meriden.—S. Watson Warden, principal of the North Colony street school in Meriden, has resigned, to take the superintendency of the Boys' club there.

\$15,000 OSWEGATCHIE FIRE LOSS

Summer Residence of Emil Utard of New York Burned—Kerosene Stove Explosion Started the Fire—Family Just Had Time to Escape.

Started by the explosion of an oil stove, fire early Monday morning completely destroyed the handsome summer residence of Emil Utard of New York, situated on Sandy Point, Oswegatchie. The occupants barely escaped with their lives and were unable to save even their personal belongings. The loss is estimated at \$15,000.

A maid went to the kitchen about 5 o'clock to prepare an early breakfast for Mr. Utard, who was to take the morning train for New York. An instant after she had lighted an oil stove, it exploded and a few seconds later the kitchen was a mass of flames. The maid escaped injury and ran screaming through the house to arouse the members of the family. They had time to seize only a few articles of clothing when they were driven outdoors by the stifling smoke and heat.

A telephone message was sent from a neighboring house to the Niagara House Co. in New London for assistance. When it was found that it would be necessary to secure the per-

mission of the mayor before the apparatus could leave the city, it was decided that by the time the engine could get to Oswegatchie the residence would be beyond saving and the effort to obtain help was abandoned.

The damage to the surrounding trees and nearby dwellings undoubtedly prevented much greater destruction by the flames. The Utard property is about a quarter of a mile from the Oswegatchie house and the fire was plainly visible from that hotel. Despite the fact that there was little or no wind, burning bits of shingles were carried as far as the home of Highway Commissioner Courtland R. Darrow, a mile away.

In two hours from the explosion of the oil stove, nothing remained of the beautiful home and its furnishings but a pile of smoldering ashes. The property was formerly owned by Mrs. C. H. Hyams, Jr., of Parkway in the Forest colony and was sold by her to Mr. Utard, who is the American representative of Ed Pinaud, the famous French perfume manufacturer.

STRONG CONCRETE BRIDGE FOR WATERFORD ROAD.

Floor Slab is About to Be Constructed—About 13 Feet Wide.

The new concrete bridge that the state is building over the brook just west of the Jordan cemetery in Waterford and across the New Haven turnpike is well along toward completion, and by the middle of this week the slab of concrete that forms the road-bed will be in place. The road-bed will be about 14 inches thick and about 13 feet wide and 22 feet long, and will extend under the electric car tracks. The tracks will be laid on six inches of dirt that will cover the concrete. The concrete slab of the bridge will be strengthened by three-quarter inch irons running both ways of the concrete work and laced together about every six inches.

The woodwork on the forms for the slab will take about two more days to complete before the work on the concrete can be done. After the concrete slab is in place it will be about another week before the bridge will be open for traffic, as it takes about a week for the concrete to dry out so that heavy travel can go over it and not in any way injure it.

LIGHTNING TORN LOCK FROM HEN COOP.

Freak Performance by a Bolt at Laurel Glen.

A story is being told about lightning striking a building in Laurel Glen Tuesday night which goes to show what queer things a bolt of electricity will do without causing material damage, says the Western Sun. There was an auction at the Sherman B. Lathrop place Wednesday, and the night before the owner of the property to be sold locked a number of hens in a hen house in order to have them ready for the auctioneer to sell the next morning.

When the man went to his hen house on Wednesday morning he found that the lock had been torn off and that the hens had gotten out. A closer investigation revealed the fact that lightning had struck the building. The lock was broken and a part of the door showed traces of the fluid which had scorched the wood work. The breaking of the lock allowed the door to swing open and when daylight came the hens made their escape. The damage done to the building was slight.

OPEN SUPERIOR COURT IN NEW LONDON

Because Court Room Repairs Here Are in the Way.

The criminal term of the superior court, which is scheduled to open on Tuesday, Sept. 5, to this city, will begin the first day's session in New London, because the court room at Norwich is in the hands of repairers and renovators. When the court convenes, the prisoners will be put to plea and with the conclusion of the day's business an adjournment for a week will be taken to New London.

Judge Williams of Derby will be on the bench.

Farmers who have to purchase grain are complaining about the high price these days and are glad that the time is approaching when their own crops can be harvested and utilized.

Why Women Suffer

Many Norwich Women Are Learning the Cause.

Women often suffer, not knowing the cause. Backache, headache, dizziness, nervousness, irregular urinary passages, weakness, languor—Each a torture of itself. Together hint at weakened kidneys. Strike at the root—get to the cause. No other remedy more highly endorsed than Doan's Kidney Pills. Recommended by thousands—Endorsed at home. Here's convincing testimony from a Norwich citizen.

Mrs. J. F. Sundstrom, Norwich, says: "For several years I suffered from backache and other symptoms of disordered kidneys. I had about despair of ever getting relief when I was advised to try Doan's Kidney Pills. I procured a supply of the remedy at N. D. Sevin & Son's Drug Store, and through their use, my kidneys were strengthened and I felt better in every way."

Price 50c at all dealers. Don't simply ask for a kidney remedy—get Doan's Kidney Pills—the same that Mrs. Sundstrom had. Foster-Milburn Co., Props., Buffalo, N. Y.

Every Home Needs a Faithful Cough and Cold Remedy.

When seasons change and colds appear when you first detect a cold after sitting next to one who has sneezed, then it is time to try a tried and tested remedy should be faithfully used. "I never wrote a testimonial before but I know positively that for myself and family Dr. King's New Discovery is the best cough remedy we ever used, and we have tried them all." 50c and \$1.00.

BENNINGTON'S NEW HIGH SCHOOL BUILDING

Where Fred D. Mabrey, Formerly of This City is Principal.

The American School Board Journal, Milwaukee, Wis., has an illustrated description of the Bennington, Vt., new high school, of which Prof. Fredrick D. Mabrey is principal. The Journal says:

The village of Bennington is situated at the southern end of the Western valley of Vermont. It is a village of 8,000 people. It is noted, nationally, as one of the most important towns for the manufacture of both underwear and of the special machinery necessary for it and as being one of the first towns of its size to have playgrounds with organized play under a trained supervisor. In many ways it is a town in the van of all progress that affects the welfare of the coming generation.

During the past year, it has added to its well-equipped school system a new high school building. This is the pride of the village and its photograph received the place of honor in the State Commissioner's annual report for 1914 as the handsomest school building erected in the state during the year.

The building is a two-story structure with a high basement, built with composition stone, made by filling the concrete with marble chips and hammering the hardened product, after the molds were removed. The trimmings, steps and cornice are of this same stone. In front are four rigid, monolithic columns, molded in situ. To gain the main entrance the visitor ascends a flight of steps between two buttresses, surmounted by electric torches and passes into an open vestibule with diverging sanded side walls. A short flight of steps leads to the main entrance doors. These doors give access to a vestibule with another set of doors which lead directly into a ten-foot corridor, which runs the whole length of the main building from east to west.

Directly opposite the main entrance are doors leading into the assembly room. It is 50 by 58, capable of seating 500 people. The floor is level and the chairs are movable so that all school functions can be held here. In front of the hall, is stage 17 by 23, with two dressing rooms at either side.

The hall has eight emergency exits all plainly indicated by red illuminated signs. Under crowded conditions the hall can be emptied in less than two minutes with no crowding.

Along the west side of the playground is the manual training shop.

On the opposite side of the playground is the Domestic Arts Cooking Laboratory, equipped with two cooking tables, made by the boys in the Manual Arts course.

For evening use, each room is equipped with five eighty-candle power Tungsten lamps.

Two sides of each room are equipped with slate blackboards and one end has built-in bookcases with drawers below and a large coat closet at the inner side of the door.

The building is of standard second class construction. The walls have been plastered with a special hard plaster. The floors are of matched hard wood with sanitary base so that there are no dust collecting corners.

The building is the best in the state from both the artistic and the usability standpoint. It cost \$90,000 for the building. With the land and the furnishings the cost has been about \$120,000. This is a cost of \$22.22 per pupil for the building or \$245 per pupil for the whole project.

PEACHES PROMISED.

This is Said to Be a Great Year for the Crop.

This is peach year, the greatest peach year the country has ever known. There is a bumper crop and Mrs. Julia Heath, president of the Housewives' league, is starting a national campaign to get growers to peach-growers at a cent apiece or less.

Mrs. Heath says the only way to make the peaches cheap is to have them in large quantities. There are 60,000,000 bushels of peaches and from 200 to 250 peaches in a bushel. Divide these peaches among the people and if the peaches are all sold by the grower and eaten by the buyers 20,000,000 families in the country must eat three bushels of peaches, or from 600 to 700 peaches.

A number of big peach-growers with whom Mrs. Heath was consulting the other day nodded in approval. If you can't eat all the peaches in your neighborhood, she says they can be preserved. The sugar men have told her that the sugar will be in great demand at present prices or even go a little lower. Peaches can be canned so they look almost as if fresh picked from the boughs and taste like it.

The campaign is being carried on by the Department of Agriculture at Washington recommends, and Mrs. Nelson.

Nettie Snyder, who is connected with the department, is at the rooms of the Housewives' league, 25 West Forty-fifth street, New York, every Tuesday afternoon at 2:30 o'clock to show how it is done. It is good for other fruits, too, and there is nothing like it for canning vegetables.

But Mrs. Heath says you can't get your great big peaches at bottom prices if you buy them in small quantities, says the New York Times. The smaller the quantity the bigger the price. There are only eight, nine or ten peaches in a small basket, but in a half bushel basket there should be from 100 to 125, and the price should be from 50 cents to a dollar, or less than a cent apiece.

The housewives' campaign is to be
